Brusselsestraat 45, bus 201,
Leuven 3000, Belgium

Profile

Full-stack engineer and front-end lead with a unique blend of humanities-driven empathy and technical rigor. Currently specialized in scalable front-end architecture and TypeScript, with a proven track record in mentorship, and bridging the gap between design and development.

Experience

Front-end Lead, AEM Consultant at Toyota Motor Europe, Brussels

01/2023–Present

Lead front-end development within one of TME's agile Digital Customer Experience (DCX) teams, owning the digital touchpoints that connect millions of monthly users to the brand across 28 NMSCs in 53 countries.

- Translate technical constraints into actionable insights for stakeholders.
- Collaborate with product owners and designers to ensure technical feasibility of complex prototypes.
- Manage development risks and resolve technical blockers.
- Automate the design to development hand-off process: created a design tokens pipeline for ensuring UI consistency and brand integrity across markets.
- Address technical debt to ensure long-term project health.
- Engineer reusable UI patterns to reduce development cycles.
- Conduct performance monitoring and optimisation.
- Conduct code reviews, enforcing best practices.
- Mentor junior engineers.
- Direct WCAG 2 compliance efforts to ensure A11y standards are met.
- Create and maintain technical documentation for knowledge sharing and onboarding.
- Estimate user stories.

Full-stack Engineer, AEM Consultant at Toyota Motor Europe, Brussels

09/2022–01/2023

- Develop new features and maintain existing components.
- Deliver assigned user stories within sprint timelines
- Participate in code reviews, and knowledge sharing.
- Work with QA to detail and resolve bugs.
- Communicate progress and blockers effectively.

Soft skills

Proactive, autonomous, adaptable,
accountable, collaborative

Full-stack Engineer, AEM Consultant at Capgemini, Diegem

09/2022–Present

Full-stack Intern at BubblyDoo, Antwerp

04/2022–07/2022

- Develop new features and maintain existing components.
- Build a custom design system in Builder.io using React.js, reducing development time for new components.
- Migrate content to Builder.io's CMS, to streamline content updates and reduce manual effort.
- Perform A/B testing on components to improve user engagement.
- Provide feedback on Figma designs.

Courses

Full-stack Developer Course at BeCode, Antwerp

09/2021–04/2022

Accrued a total of 800 hours of practical coding experience by working on independent projects, as well as in teams, following the scrum methodology. Established solid programming fundamentals and explored the use of essential web development technologies.

Education

BA Liberal Arts & Sciences, Tilburg University, Tilburg

09/2021

Developed strong analytical and communication skills within a multidisciplinary academic framework.
